

Diverter valves DN50 – DN200

Diverter valve for pneumatic conveying lines with heavy-duty construction for abrasive and challenging applications. Pneumatically operated by a bi-stable solenoid valve and actuator with a limit switch box on top. Diverted 30° to the right is standard, left turn on request. Manufactured in carbon steel as standard but can also be delivered in stainless steel on request. Delivered with welding flanges, gaskets and bolts.

Technical conditions

- Pressure: < 10 bar
- Temperature: < 120 °C
- Voltage: 24V/DC or 230V/AC
- Protection class: IP65
